DATE: 25X1A6a

INFO. [REDACTED]

SUBJECT Status of V-Weapon Installations in the Bleicherode Area

DIST. 16 May 1947

PAGES

SUPPLEMENT 25X1A2g

25X1A6a

ORIGIN

25X1X6

1. The Institute Rabe in Bleicherode (C91) was evacuated and returned to the Elektrizitätsgesellschaft Südharz. Factory I at Niedersachswerfer (D13), Factory II at Nordhausen (D12), and Factory III at Kleinbodungen (C92) were evacuated, and Factories II and III were also dismantled. The Russians departed from most of these units in February.
2. The Zentralwerke in Sondershausen (D11), now called "Elektrobau" is constructing "Messina Geräte", transportable test stands, and "Pneumatische Prüfpulte" (pneumatic control desks?); the plant is under the direction of Director General Friedel. The Soviet executive, Major Cherdok, departed from Sondershausen in February and said he expected to return this summer for the last time. Engineers in Sondershausen, therefore, believe the installation may be dissolved in the summer.
3. Mail received from former personnel of the Zentralwerke confirms their location in the U.S.S.R. as approximately forty kms from Moscow.
